Overview: about the agency

Our strategic focus

The Stormwater Management Authority (the Authority) implements the Agreement on Stormwater Management between the State of South Australia and the Local Government Association of South Australia. The Authority supports the development and implementation of multi-objective stormwater management plans that address flood risk, environmental amenity and water security to maximise the public benefit of stormwater.

The Authority operates as a body for the planning, prioritisation and funding of stormwater management initiatives, and administers the Stormwater Management Fund which provides funding for stormwater planning and infrastructure projects that meet specific guidelines.

In collaboration with local government, the Authority works to:

- Ensure that stormwater is recognised as an integral part of urban water management
- Maximise opportunities for stormwater to provide public health and economic benefits
- Mitigate the impacts of stormwater on people, property and the environment.

Our organisational structure

In accordance with section 7 of Schedule 1A to the *Local Government Act 1999*, the Authority consists of a board comprising one Presiding Member and not less than six other members.

Act or Regulation	Requirement
Section 30(2)(d) of Schedule 1A to the <i>Local Government Act 1999</i>	An assessment by the Authority of the adequacy of the Fund to meet claims on the Fund under this Schedule and the Stormwater Management Agreement

The Fund has been adequate to meet agreed commitments for stormwater initiatives and projects to date. In the 2025 call for grant applications for works projects

OFFICIAL

2024-25 ANNUAL REPORT for the Stormwater Management Authority

(Category C) the demand for funding was more than twice the capacity of the fund and not all projects of merit could be offered a grant.

Through the completion of stormwater management plans and other initiatives, the Authority is aware of significant and emerging priorities for stormwater management and flood mitigation that far exceed the present capacity of the Fund.

In line with the state government commitment to implement the Brown Hill Keswick Creek Stormwater Management Plan, the Authority approved a contribution of \$4 million to the Brown Hill and Keswick Creeks Stormwater Board (BHKCSB) in 2024-25. In 2025-26 the Authority will continue to make a significant contribution to the BHKCSB for works identified in the Brown Hill and Keswick Creek SMP. The overall delivery of these works is constrained by the capacity of the Authority and the constituent councils to provide cash-flow.

The Authority accepts funding applications for non-works projects at any time. In 2024-25 the Authority awarded \$524,000 in funding for non-works projects. Funding for works projects is awarded only after a call for applications. The Authority made one call for applications for works projects in 2024-25. The works related grants awarded in 2024-25 total \$6.419 million, including the BHKCSB contribution.

The cash balance of \$11,413 million at 30 June 2025, together with the state government contribution of \$ 6.393 million in 2025-26, there are adequate funds to meet:

- Commitments to the BHKCSB of \$4 million in 2025-26
- Commitments to other projects with expected payments in 2025-26 totalling \$9,075 million.

The forecast cash flows for the Fund will require the careful consideration and prioritisation of any potential new funding commitments in 2025-26.
